esys64 is a refreshable 64 cell Braille display with integrated Braille keyboard and navigation keys. It can be used independently or as part of a PC workstation via Bluetooth or USB technology. It has a professional and discrete design with grey aluminium housing and black plastic details.

esys64 features a 10 key Braille keyboard, which allows the possibility to reproduce all standard key combinations, both for typing and navigation, enabling the user to fully navigate the computer, Windows and application.

esys64 has two joysticks located to the left and right of the Braille line which can be used to easily control Microsoft Windows, or screen reader menus. The lower front navigation wheels are used to faster browse through information.

Thanks to esys64 efficient battery life and its modern design, it is the perfect partner for your everyday work life!

Compatibility

- Jaws
- Window Eyes
- Supernova
