Product solutions for
Improved Vision
ImproVision offers…

… global access to SCHWEIZER’s leading range of product solutions for improved vision in addition to ImproVision’s own distinctive range of high addition spectacles and light protection spectacles.

Our highly specialised country distributors do not only import and store our products for fast delivery, but also receive regular and comprehensive training from our experts for improved vision. This network of national distributors is continuously being expanded for the benefit of local eye care professionals and their customers in a growing number of countries.

Eye care professionals can select the ideal product tailored to meet the particular needs and abilities of patients as well as their remaining visual acuity.

ImproVision is a subsidiary of SCHWEIZER and services the company’s global export activities.

SCHWEIZER – tradition stretching back to 1840. As one of the oldest owner-managed companies in the German ophthalmic optics sector, SCHWEIZER is a leading provider of low vision solutions. It is firmly established as “Der LowVision-Spezialist” and has an international reputation.

SCHWEIZER’s tried and tested, user-friendly, pioneering products for improved vision are for cases where spectacles are no longer enough – they help people with impaired vision enjoy a better quality of life.

SCHWEIZER boasts Europe’s largest range of specialist visual optical aids. All SCHWEIZER illuminated magnifiers and reading magnifiers are made in Germany. It is no coincidence that satisfaction among SCHWEIZER’s customers is high. Many years of experience, certified expertise and the dedicated commitment of its employees have made SCHWEIZER an innovative company.

More…

…about us and our range of product solutions can be found at
www.improvision-lvs.com
or
www.schweizer-optik.co
SCHWEIZER’s MODULAR magnifier range was the first in the world to offer a modular magnifier system with interchangeable magnification heads. In 2000, SCHWEIZER launched the ÖKOLUX, the world’s first illuminated magnifiers with an LED light. Later, the company set new standards with its ergonomic magnifier series ERGO-Line.

SCHWEIZER passes on its professional expertise through a comprehensive range of training courses and seminars and, since 2014, through an online information platform and online seminars.

The Optik-Akademie provides training for eye care professionals in how best to fit and dispense magnifying visual aids.

SCHWEIZER will continue to expand its leading position in the arena of magnifying visual aids.

5. Light protection spectacles
6. Telescopes
7. Professional tools
The retinal image can be enlarged by reducing the distance between the object and the eye below the normal reading distance (relative distance or approach magnification).

However, the presbyopic eye is no longer able to focus on objects at such a close distance. This loss of accommodative ability requires corrective optics such as high addition spectacles.

Patients with binocular potential need glasses with base-in prisms to support convergence.
**Prismatic half-eye spectacles**

- **IV PRISMATIC**

Prismatic half-eye spectacles with a pair of high addition lenses including prisms to support convergence for binocular close distance magnification.

- Spherical CR 39 lenses
- Black matt PA polymer frame in size 43-25
- Frame size and power printed inside temple
- Supplied with protective case
- Made in the European Union

Magnifiers are one of the traditional aids to improve vision and are thus a preferred solution for visually impaired people.

They are used wherever it is necessary to enlarge an image. Be it for reading, in cases of reduced visual acuity, or to see details more clearly in hobby or leisure activities.

Illuminated magnifiers combine such an enlarged image with the advantages of optimised lighting. Individually tested light temperatures maximise reading comfort. Patients achieve better visual acuity with good and appropriate lighting.

LED illuminated stand magnifiers

**ERGO-Base & ERGO-Lux MP**

The ERGO-Base fixed-focus holder converts the ERGO-Lux MP into the perfect illuminated stand magnifier.

- Patented magnetic design for easy connection without wear and tear
- Easy scrolling on the object
- Comfortable reading position thanks to tilt feature in the holder which locks into place for firm and stable hold
- Suitable for right and left-handed use of all round lenses
- Bright holder material colour enhances illumination provided by ERGO-Lux MP
- Portable through easy separation of magnifier and holder

For details about ERGO-Lux MP hand magnifiers, please refer to the previous page.

Items can be ordered with or without the necessary batteries as per price list.
LED illuminated stand magnifiers

ÖKOLUX plus

Battery operated illuminated stand magnifier with a 4-chip SMD LED available in 3 light temperatures.

- Individually tested light temperatures can reduce the magnification needed
- Tilt of 8 D magnification head convertible for right or left-handed use
- Very bright, consistent and high-contrast light through the special light emitting diode
- Ideal illumination of the reading material or viewing object enhanced by light-coloured material of the closed magnification head
- Low energy consumption and long battery life – easy battery replacement thanks to hinged battery box cover
- Aspheric lightweight lens
- 3 AA alkaline batteries required

155002 Pack of 3 AA alkaline batteries
ÖKOLUX plus magnification heads

Easily interchangeable closed magnification head for different magnification powers.

ÖKOLUX plus magnifier handles

Easily interchangeable magnifier handle for different light temperatures.

Items can be ordered with or without the necessary batteries as per price list.
LED illuminated stand magnifiers

MODULAR LED

Battery operated illuminated stand magnifier with three 4-chip SMD LEDs available in 3 light temperatures.

- Easily interchangeable open magnification heads, available in different magnification powers
- Possibility to write under the low power lenses
- Individually tested light temperatures can reduce the magnification needed
- Adjustable head tilt for right or left-handed use
- Very bright, consistent and high-contrast light through 3 precisely aligned special light emitting diodes
- Low energy consumption and long battery life – easy battery replacement thanks to hinged battery box cover
- Aspheric lightweight lenses
- 3 AA alkaline batteries required
Items can be ordered with or without the necessary batteries as per price list.
LED illuminated stand magnifiers

- **TWIN-Lux LED**

  Illuminated stand magnifier with three 4-chip SMD LEDs available in 3 light temperatures for battery or mains operation (only 230 V / 50 Hz with Euro plug).

  - Offers the world’s largest field of view at 4.4x magnification
  - Individually tested light temperatures can reduce the magnification needed
  - Comfortable reading posture through ergonomically tilted design
  - Very bright, consistent and high-contrast light through 3 precisely aligned special light emitting diodes
  - Low energy consumption and long battery life
  - 2 aspheric lightweight lenses at an accurately computed distance
  - 3 AA alkaline batteries required for battery operated version only

Special magnifiers

- Working stand magnifier with glass lens
  - Cast base coated with black plastic Ø 130 mm
  - 300 mm flexible metal gooseneck arm
  - Aplanatic optical system in chrome-plated metal mount

- Working stand magnifier with lightweight lens
  - Cast base coated with black plastic Ø 130 mm
  - 300 mm flexible metal gooseneck arm
  - Aspheric lightweight lens in black plastic mount

- Needlework magnifier
  Ideal magnifier for needlework made from transparent acrylic.
  - Adjustable neck cord
  - Biconvex lightweight lens with higher power insert to see details more clearly
RIDO-Clip

- 2 joined lenses including prisms to support convergence
- Clips to the spectacles of the wearer
- 3 different magnification powers
- Hard coating
- Solid case included

In comparison with standard magnifiers, this clip-on magnifier has some advantages:
- Lightweight
- Wide field of view
- Base-in prisms improve eye convergence
- Simply clips onto spectacles for ease of use
- Allows hand-free activities

In most cases, visually impaired people can improve their vision with traditional optical aids. In some situations, electronic solutions can be of further help. The video magnifiers featured in the SCHWEIZER eMag series provide additional options to improve vision around the home or on the go.

Please refer to www.improvision-lvs.com for detailed information on these products
Please refer to www.improvision-lvs.com for detailed information on these products.
One of the key elements of low vision solutions is the provision of special lighting to suit the patients’ individual needs.

Multiple studies conducted by Professor Hartmann from Munich/Germany with visually impaired people have shown that the provision of appropriate lighting can significantly improve visual acuity. An individually tested light temperature ensures comfortable and relaxed reading.

With optimised lighting, the magnification otherwise needed can be reduced.
LowVision lamps

- **MULTILIGHT LED Floor**

  Floor lamp with 72 durable and energy-efficient SMD LEDs.
  - Switch integrated in the lamp head
  - Gooseneck allows for flexible, 3-dimensional positioning of lamp head
  - Dimensions:
    - Base to gooseneck: 86 cm
    - Gooseneck: 43 cm
    - Lamp head: 29 cm
  - 170 cm power cord with Euro plug for 100 – 240 V / 50 – 60 Hz

**Light temperatures:** 2700 K | 4500 K | 6500 K

- **MULTILIGHT LED Floor**

  937283 | 937483 | 937683

**Multilight LED Floor**

937283 | 937483 | 937683
**MULTILIGHT LED Table**

Table lamp with 42 durable and energy-efficient SMD LEDs.

- Solid table base included, optional table clamp available
- Convenient sensor switch integrated in the lamp body
- Lamp head can be adjusted 180° horizontally, 45° vertically and axially
- Height of lamp head adjustable from 40 cm up to 60 cm
- Maximum horizontal deflection 70 cm
- Footprint: 18 x 24 cm
- Weight: 1700 g
- Supplied with 150 cm transformer cable with Euro plug for 100 – 240 V / 50 – 60 Hz

**MULTILIGHT LED Akku**

Folding task lamp with 48 durable and energy-efficient SMD LEDs.

- Adjustable height due to extendable head
- Designed to reduce glare and make reading easier
- Dimensions & weight:
  - Footprint: 9 x 13.5 cm
  - Height (maximum): 35 cm
  - Weight: 1600 g
- Mains or battery (rechargeable) operated for greater flexibility
- Supplied with 190 cm transformer cable with Euro plug for 100 – 240 V / 50 – 60 Hz
LowVision lamps

- **MULTILIGHT LED Mobil**
  Compact folding task lamp with 30 durable and energy-efficient SMD LEDs.
  - Switches on and off automatically as the head is opened and closed
  - Lightweight, requiring only little space
  - Dimensions & weight:
    - Footprint: Ø 8.2 cm
    - Height: 26 cm
    - Weight: 250 g
  - Mains or battery operated; for battery operation 3 AAA alkaline batteries are required
  - Supplied with carrying case and 150 cm transformer cable with Euro plug for 100 - 240 V / 50 - 60 Hz

- **MULTILIGHT LED Pocket**
  Handy folding task lamp with 12 durable and energy-efficient SMD LEDs.
  - Switches on and off automatically as the head is opened and closed
  - Fits in every pocket, convenient built-in clip and integrated lanyard loop
  - Dimensions & weight:
    - Size: 5.9 x 8.4 cm
    - Weight: 70 g
  - Battery operation (3 AAA alkaline batteries required)

---

**MULTILIGHT LED Mobil**

937243 937443 937643

**MULTILIGHT LED Pocket**

937263 937463 937663

180902 Pack of 5 lanyards
180912 Pack of 5 wrist straps
156002 Pack of 3 AAA alkaline batteries
Reading stands

- **MULTILIGHT LED reading stand**
  - Small footprint with a surface of 28 x 21 cm, extendable up to 38 x 33 cm
  - Designed not to slip on a table surface
  - Inclination adjustable in multiple steps
  - Black plastic
  - Illumination with 20 durable and energy-efficient SMD LEDs
  - Mains or battery operated; for battery operation, 3 AAA alkaline batteries are required
  - Supplied with 150 cm transformer cable with Euro plug for 100 - 240 V / 50 - 60 Hz

- **Standard reading stand**
  - Large surface with a size of 40 x 50 cm
  - Designed not to slip on a table surface
  - Inclination adjustable in multiple steps
  - Natural wood

- **Economic reading stand**
  - Surface with a size of 32 x 28 cm and a fixed inclination of 23°
  - White plastic
  - Pack of 2 pieces
People with reduced visual acuity often also experience lower contrast sensitivity.

Decreased contrast sensitivity may arise from cloudy ocular media, retinal deposits, the loss of receptor cells or similar.

Special blue blocking or comfort filters provide help in this context and enhance the ability to see in contrast.
Light protection spectacles with filter lenses

**IV PROSHIELD Wrap-Around**
- Black matt PC polymer frame in size 61-17
- PC polymer filter lenses
- Frame size and filter number printed inside temple
- Supplied with cloth pouch
- Made in the European Union

Visually impaired people – often elderly people – frequently express the desire to be able to watch TV and to read newspapers, bank statements, telephone directories or drug package inserts, for example.

Consequently, maintaining or restoring reading ability is essential when it comes to magnifying aids. Telescopic systems are a possible solution to this challenge, since they enable both near and distance viewing.

Telescopes with a magnification power of up to 6x can be mounted on a frame to create hands-free telescopic spectacles. For higher magnification strengths, hand-held monocular telescopes are also available.
Galilean telescopes

Small and lightweight fixed focus Galilean telescope with multi-coated lenses in an aluminium housing.

- Two groups of computer-optimised lenses with multilayer AR coating
- Designed for mounting in a frame, lock ring included
- Ideal for SCHWEIZER telescope frames as shown on pages 52 – 53
- Factory-set to infinite focal distance; front caps for intermediate (e.g. TV) and close distances (e.g. reading) available
- Refractive errors can be corrected with a lens mounted on the system’s ocular side (Ø 22 mm). Adjustment to the working distance possible with the same corrective lens
- Calculation of the required plus lens power for adjusting the focal distance by multiplying the system magnification by itself and dividing the result by the focal distance required in metres
- Binocular use for close working distances possible with special mounting lenses

Front caps

Front caps for intermediate (e.g. TV) and close distances (e.g. reading).

- Basic front cap snaps into place with audible click for firm hold
- Optional Add-on front caps can be combined with Basic front caps to provide higher magnification and variable working distances. Add-on front caps flip up easily when not in use
- Combined use of Basic and Add-on front cap creates an aplanatic front cap without spherical aberrations
- Different working distances ranging from 200 to 4.17 cm can be combined
- Calculation of the working distance based on the system’s pre-set infinite focal distance by dividing 1 by the D power of the front cap(s). The close distance magnification is the system magnification multiplied with one quarter of the D power of the front cap(s)
Binocular use

Mounting lens for binocular use with the relevant convergence.

- Mounting lens packed in pairs with mounting adapters for corrective lenses
- Mounting lens made from PMMA material (Plexiglas®)

---

**931067  Trial box Galilei 2.1x and 2.5x**

Contents: 2 each in 2.1x and 2.5x in adapter for trial frame; Basic front caps 2 each in +0.5 D, +0.66 D, +1.0 D and 1 each in +1.5 D, +2.0 D, +3.0 D, +4.0 D, +5.0 D, +6.0 D, +8.0 D; Add-on front caps 1 each in +4.0 D, +8.0 D

---

**931116  Case for telescop ic spectacles**

---

**931287  Trial box Galilei 1.8x**

Contents: 2 pieces of 1.8x in adapter for trial frame; 2 Basic front caps in +0.5 D; 1 titanium telescope frame 935806; measuring tape; empty slots for additional Basic and Add-on front caps

---

**Mounting lens with adapter for 15 mm corrective lens**

- **933225** Binocular use for 200 mm working distance, 2 pieces
- **933255** Binocular use for 250 mm working distance, 2 pieces
- **933235** Binocular use for 330 mm working distance, 2 pieces
- **933265** Without convergence for reduced back vertex distance BVD, 2 pieces

---

**Convergence adapter for trial frame**

- **933315** 200 mm; 5.0 D; 2 pieces
- **933325** 250 mm; 4.0 D; 2 pieces
- **933335** 330 mm; 3.0 D; 2 pieces

---
Keplerian telescopes

Small and lightweight focusable Keplerian telescope.

- Multi-coated achromatic precision optics
- Focusable from infinity to about 250 mm
- Designed for mounting in a frame, 2 lock rings included
- Optional adapter allows use of front caps of SCHWEIZER Galilean telescopes for intermediate and close working distances
- Ideal for SCHWEIZER telescope frames as shown on pages 52 – 53

931935 3x9
Magnification 3x, field of view 12.5°, objective Ø 9 mm, silver black metal housing

931945 4x10
Magnification 4x, field of view 10.0°, objective Ø 10 mm, silver black metal housing

931955 4x12
Magnification 4x, field of view 12.5°, objective Ø 12 mm, silver black metal housing

932165 6x16
Magnification 6x, field of view 10.0°, objective Ø 16 mm, black metal housing

931077 Trial box Kepler
Contents: 1 each of 3x9, 4x10 and 4x12 in adapter for trial frame; 1 focus stop ring each for 3x9, 4x10 and 4x12; 1 adapter for Basic front caps suitable for 3x9, 4x10; 1 empty slot for 6x16 monocular with finger ring (not included)
Application tip

SCHWEIZER Keplerian systems can be focused to different working or reading distances as required. Furthermore, they offer the following application options:

Application with focus stop ring
The eye care professional adjusts the telescope focus to the desired distance, e.g. for watching TV, and fastens the focus stop ring on the housing to act as a stopper.

For closer working distances, the visually impaired person can still turn the objective lens outwards until the image is crisp and clear. Turning the objective lens back until the stopper is reached, refocuses the telescope for the original application, such as watching TV.

Application with fixed focus
The eye care professional adjusts the telescope focus to the desired distance, e.g. for watching TV, and locks this setting using the locking screws in the housing. For close working distances, the front caps of SCHWEIZER Galilean telescopes can be used with an adapter.

It is recommended to use fixed focus systems for visually impaired people who lack the necessary fine motor skills.

937116 Case for telescopic spectacles
Telescope frames

Only special telescope frames designed for a perfect anatomic fit ensure the ideal function and efficient use of telescopic spectacles.

- **Titanium telescope frames with variable saddle bridge system**
  - Material: 100% titanium, welded, hypoallergenic, solder-free, screws and saddle bridge insert made from stainless steel
  - Weight: 16 g
  - Temple: Golf temple 145 mm, easy to shorten, silicone-coated plastic temple ends, common sport temple ends mountable
  - Adjustable saddle bridge, flat saddle bridge for reduced back vertex distance BVD included
  - Meets the technical and medical requirements for listed aids of the compulsory health insurance in Germany
  - Unisex: style and colouring suitable for men and women alike

</tbody>
</table>

**Please note:**

In most cases a large back vertex distance BVD is necessary for telescopic spectacles. SCHWEIZER telescope frames are designed accordingly. However, if needed, the BVD of the titanium telescope frames with variable saddle bridge systems can be reduced by 3 mm. For this purpose, a flat saddle bridge (included) can be mounted. This is a fast and easy way to react to different optical and anatomic conditions.

Case for telescopic spectacles
Titanium telescope frames

- Material: 100% titanium, welded, hypoallergenic, solder-free, screws and saddle bridge insert made from stainless steel
- Weight: female model 16 g and 17 g, male model 17 g and 18 g
- Temple: Golf temple 145 mm, easy to shorten, silicone-coated plastic temple ends, common sport temple ends mountable
- Adjustable saddle bridge
- Ideal for curved mounting lenses
- Meets the technical and medical requirements for listed aids of the compulsory health insurance in Germany
- Stylish female and male model

Monoculars

- Hand-held Keplerian telescope
  - Multi-coated achromatic precision optics
  - Fold-down rubber eyecup for spectacle wearers to correct BVD
  - Ideal for retaining individual mobility (ability to see street signs, train or bus schedules, price tags, etc.)
  - Small and handy
  - Focusable from infinity to about 250 mm
  - Soft case and neck cord included
  - Use as a hand microscope with the acrylic stand, which can also be used separately as a 3x stand magnifier

Extender

- Multi-functional aid for mobile use. Comfortable viewing thanks to steady and brilliant image.
- Easy to use hand-held telescope (similar to a 2x fixed focus telescope) with a large depth of field
- Inverting the extender doubles the field of vision – ideal for tunnel vision and retinitis pigmentosa (RP)
- Textured grip ensures excellent feel
- Fold-down rubber eyecup for spectacle wearers to correct BVD
- Convenient lanyard loop (lanyard included)
Assessment charts help eye care professionals systematically detect and treat vision disorders. These indispensable tools have been specifically designed for low vision assessment and are all supplied with quick start guides.
Vision tests

- **SZB Bailey-Lovie chart set**
  - Set of 2 panels with logarithmic progression of optotypes
  - 5 optotypes per visual acuity level
  - Suitable for use at any viewing distance
  - Panel 1 for measuring distance visual acuity at normal contrast
  - Panel 2 for measuring distance visual acuity at low contrast
  - Dimensions: 56 x 65 cm (W x H)

- **Near vision reading test set**
  - Up-to-date test in logarithmic layout according to DIN 58220 and ISO 8596. The test chart consists of unrelated sentences in different letter sizes. The notation below the smallest print the patient can still read fluently indicates the magnification required for reading newsprint. The Amsler grid test is included in the set.

- **Amsler grid test**
  - The Amsler grid test for detecting and monitoring symptoms of macular degeneration is straightforward to administer. It comes printed on sturdy paper for ease of use.
